Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

- a. Group I, claim(s) 1-3, 5-7, 12, 13, 19-27, and 50, drawn to a visible-light-responsive three-dimensional fine cell-structured photocatalytic filter, in the point that a sponge-like porous structural material contains a carbon, silicon, and/or silicon alloy.
- b. Group II, claim(s) 8-10, 12, 13, 19-22, 28-35, and 50, drawn to a visible-light-responsive three-dimensional fine cell-structured photocatalytic filter, in the point that a sponge-like porous structural material contains at least one kind selected from the group consisting of silicon carbide, silicon, silicon alloy, and carbon.
- c. Group III, claim(s) 14, 15, 19-22, 28-35, and 50, drawn to a visible-light-responsive three-dimensional fine cell-structured photocatalytic filter, in the point that a sponge-like structural material contains carbon.
- d. Group IV, claim(s) 11-13, 19-22, 36-39, and 50, drawn to a visible-light-responsive three-dimensional fine cell-structured photocatalytic filter, in the point that a sponge-like structural material contains at least one kind selected from the

group consisting of silicon nitride, silicon, silicon alloy, carbon, and silicon carbide.

e. Group V, claim(s) 4, 16-22, and 44-50, drawn to a visible-light-responsive three-dimensional fine cell-structured photocatalytic filter, in the point that a sponge-like structural material contains carbon and titanium.

2. The inventions listed as Groups I through V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The inventions listed in claims 1, 14, 15, 40, and 41, in claims 20-22, in claims 42 and 43 appear to be anticipated by or obvious over Japanese Publication No. 02-691751, which describes immersing a carbon network structure having a porosity of at least 85% in a slurry solution containing a titanium hydroxide, and performing slurry coating and baking at 500°C to obtain a photocatalyst structure.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
